### Harvest Moon

Wow! Summers almost over and we are heading into the fall and that means fall harvest is not far behind.

It is interesting to note that each month has a name for its full moon, most of which are derived from Native Americans in the North Eastern parts of North America.

The Harvest Moon is one such moon which this year arrives on Thursday September 23rd at 06:13AM. The full moon that is nearest the autumnal equinox becomes the Harvest Moon. The fall or autumnal equinox in 2010 is on September 22nd at 11:09PM. About once every 4 years the Harvest Moon occurs in early October.

You might be wondering at this point what this has to do with the brewery? Well I'm glad you asked.

This year we are brewing a new beer which will be called "**Rudder's Harvest Moon Ale**". We plan to add some local grown hops from the valley to give it a mildly hoppy finish.

Watch for it on or about Septembers full moon, the Harvest Moon.
